

HERA ARMS

HIGHGRADE EUROPEAN RESEARCH FOR SMALL ARMS

TRIARII

SIG 226 / 2022
Glock 17/19/20/21/22/23/31/32/34/35
CZ SP01

The new world of pistol carbine conversions is now here. Hera Arms gladly announces the new Triarii. The Triarii has been designed to meet the functions and needs of today's law enforcement/military, agency and sport users. A click and fire system has been developed to ensure that response time is reduced and maximum capability is given. With an 4 second installation/ready to fire time; Hera's Triarii can now provide needed time to any situation. We are honored to have worked with various agencies, officials and customers throughout Europe, listening to their needs and wishes.

Available Stripped or complete with Magpul Front and Back Flip up sights, Magpul AFG, Folding Stock Adapter and M4 Stock in our RTU (Ready to use) package.

GCC

Glock 17/19/22/23/31/32

The Hera GCC (Glock Carbine Conversion) gives the advantage of a SBR to a Glock Pistol. The pre-installed Picatinny rails on the 12 and 6 o'clock position makes it possible to install aftermarket accessories such as optics and open sights as well as foregrips. At the front of the GCC there are points for two additional Picatinny rails located at the 3 and 9 o'clock positions. The charging handle can be installed on either the left or right side for user preference.

With the versatility of the GCC stock the following Glock models may be used: G17/22/31 & G19/23/32. Users may also install longer barrels problem-free.

CPE

1911 A1 MIL-SPEC

The Hera CPE was developed for Mil-Spec 1911 pistols. The design gives the possibility of transforming a 1911A1 into a fully functional carbine. From modern polymers the CPE is manufactured with a steel core and creates a solid platform for optics and other accessories. Alternatively the shoulder stock can be removed for use with a sling swivel.

With the CPE the 1911 becomes a pistol with more flexibility for use with different shooting disciplines. For assembly, only the grip screws and original grips must be removed, the 1911 is then placed into the housing and refastened. The CPE permits the use of changing systems like .22 or 9mm and also the use of longer barrels up to 16". All AR15/M4 style shoulder stocks can be installed.

BCK

HK SL8

The Hera BCK (Buttstock Conversion kit), developed for the H&K SL-8 rifle, replaces the thumbhole stock of the standard SL-8. Therefore the BCK offers the compatibility to use AR15 pistol grips and the possibility of AR15 butt-stocks to be installed. The original trigger group of the SL8 may be used. No permanent changes are necessary to install the BCK to the original weapon. The BCK is supplied with an installed Hogue pistol grip.

When using the BCK housing, the H&K SL-8 receives responding optics and outstanding ergonomics. The BCK is manufactured from a high quality and stable aviation aluminum.

FSC

HK USC

For the H&K USC Hera has developed the FSC (Folding stock Conversion). With the folding stock the weapon can be transported more easily and with the textured pistol grip ergonomics have been increased. The FSC makes an optically responding and ergonomic weapon out of your H&K USC. The sporty usefulness remains.

MAG20

HK USC

The 20rd. USC Magazine, produced by Hera, is made entirely out of high grade aluminum using the best CNC-milling technology available. Hera understands that not all areas allow for a full 20rd magazine so we also produce a 5rd and 10rd magazine to meet local law. You will still be able to get the length and look that you want without having rivets or pins.

FSA

Franchi SPAS-15

Available now is the H.E.R.A. Franchi-Stock-Adapter for the Franchi SPAS-15. With a simple installation involving a two-part construction using 3x an interior lying stainless steel bolts. We now offer you a new stock adapter that allows the use of a M4 style stock while still staying in the legal length of 95cm (depending on local laws).

Adapter package includes: M4-style stock, adapter block, interior screws and cover plate with tread.

GAS BLOCK

A new addition to the Hera Arms AR15 line is the low profile gas block. Machined using high precision CNC milling and out of a solid aluminum block. The Gas Block is coated with a black oxidation and is fastened from the side with two screws. Easy installation with a great new look.

HLS

AR15 based Weapon Systems

The HLS is a modern designed, semi-auto receiver made from high-quality aluminium (7075T6) and is built to handle the hardest use and abuse of tactical and competitive shooting. The AR lower is CNC milled from aircraft aluminium alloy and hard coated anodized for added strenght. The HLS comes with a pre-installed ambidextrous bold release.

HUS

AR15 based Weapon Systems

The HUS (Hera Upper System) is developed to the give customers a newly designed upper receiver and still keep the MIL Spec fit. Using high quality aluminum makes the HUS upper receiver a more rigid platform. We use the best CNC machines available to ensure that all dimensions are met and that the upper receiver has a tight fit, this increases the life and accuracy of the weapon system.

HCL

AR15 based Weapon Systems

The HCL, Hera Commercial Lower, is a newly designed standard AR15/M4 lower system. Keeping Hera's high standard of material and CNC machine milling, we now offer a perfect way to add a new lower to changing systems or to get set up for a new rifle build. Designed and manufactured in Germany.

HCU

AR15 based Weapon Systems

Hera's HCU (Hera Commercial Upper) is built of a 7075T6 Aluminum and milled using the newest 5 axis CNC machines available. Its new design makes the HCU a streamline and hassle free AR15 upper system. Through design tests and customer feedback, Hera now offers a clean and practical addition to its AR15 parts line, basically design for use with .22 conversions. Removing the forward assist and changing the contour of the upper gives that custom look without the hefty price tag.

COMBO

AR15 based Weapon Systems

Hera Upper / Lower Combos stripped

The Upper / Lower Combos are modern designed, semi-auto AR housing parts made from highquality aluminium and are build to handle the hardest use and abuse of tactical and competitive shooting. The Combo is CNC milled from aircraft aluminium alloy and hard coated anodized for added strenght. Available in Black and TAN.

COMBO FULL

AR15 based Weapon Systems

Hera Upper / Lower Combos full

The Upper / Lower Combos are modern designed, semi-auto AR housing parts made from high-quality aluminium and are build to handle the hardest use and abuse of tactical and competitive shooting. The Combo is CNC milled from aircraft aluminium alloy and hard coated anodized for added strenght. Available in Black and TAN. The „full“ version contains a complete Lower-Parts-Kit, Upper-Parts-Kit, a Charging Handle, M4 Buttstock (incl. Spring and Buffer), a Magpul MOE Grip and a B.A.D. Lever.

IRS

AR15 based Weapon Systems

The Hera Arms IRS is a modern designed, Quad-Rail Handguard made from high-quality aluminium and is build to handle the hardest use and abuse of tactical and competitive shooting. The IRS is CNC milled from T6060 aluminium alloy and hard coated anodized for added strength. Available in lengths of 7", 9", 12" and 15". The IRS comes with his own barrel nut where the Handguard is clamp mounted with 3 screws for additional strength. The anti-tum millings prevent turning even at the hardest use.

LINEAR COMPENSATOR

AR15 based Weapon Systems

Linear Compensator:

.223 / 5.56 Linear Compensator for use on short barreled rifles. The inside design is with 12 separate expansion chambers which leads the blast and noise straight forward to increase shooting comfort and reduce noise at the shooters ears.

Available in 1/2 x 28, M14x1 and M15x1 threads.
